*"The Surviving Your First Year Workshop was such a wonderful resource and provided information, hints, and tips that will be irreplaceable as I start my career as a professional registered nurse. I was able to learn the tools to be successful in the application process, review lab values, be informed on bullying and burnout, and have an informational question and answer with other graduates that have recently undergone this journey. Graduating from nursing school is an exciting but intimidating prospect and I feel as if this workshop has set me up for success in my future!"*
