Email: cymz@sbcglobal.net

Session you have been asked to present:

Date and time: Tuesday, April 9 from 3:30-4:30 PM
Session Number: Breakout Session 2C
Topic to present: PANDAS
Co-Presenters: Kim Jakubowski
Planning Committee contact for questions: Louise Wilson - louise.wilson@dpi.wi.gov

Session title as it should appear in program materials:

PANDAS in a School Setting: A Parent's Perspective

Description of content you will cover - as it should appear in program materials: *Please be specific about what you will address*

PANDAS or Pediatric Autoimmune Neuropsychiatric Disorders Associated with Streptococcal Infections is one term used to describe certain acute onset neuropsychiatric disorders. While controversy is ongoing concerning the diagnosis and etiology of the disorders, the impact on students and their families is real. Phil and Kim Jakubowski are the proud parents of a daughter affected by this disorder. They will share their experiences with the school system and provide school nurses with knowledge so attendees can play an assistive role in helping teachers and schools to understand the condition, as well as help the affected student to achieve success in school.

Please write a few lines we can use to introduce you at the conference:

Phil and Kim Jakubowski are the proud parents of 2 intelligent girls. The day after their oldest child turned 12 they received the first of many calls from their child's school. Their nearly academically perfect child had changed overnight. Their world was turned upside down. Their daughter's experience with the school was not always positive. As such they have become advocates in helping schools and healthcare professionals understand the emotional distress and significant negative effect on a child's school performance.
