Keynote Address

TITLE: Forecasting the Futures of Health Care: Imperatives and Challenges for Advanced Practitioners

PRESENTER: Jeffrey C. Bauer, PhD, FAANP(H)

Registered (8/11/20): 211 # Completed Evaluation: 215

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
The presenter(s) demonstrated expertise in this content area.	172	37	6		
The information presented was relevant to my learning needs/practice situation.	146	45	21	3	
				YES	NO
Do you intend to make a change in practice based on what you learned in this session? Please explain:				93	122
<p>answer YES:</p> <p><i>Always look forward! The only constant is change.</i></p> <p><i>At my organizational level will try to recognize the constraints that might exist in the system. awareness and action</i></p> <p><i>be more aware of health care forecast</i></p> <p><i>Be more aware of what's happening in healthcare.</i></p> <p><i>Be more involved in political activities advocating for APRNs.</i></p> <p><i>Become more active to promote all advance practice provider</i></p> <p><i>Become more outspoken for independence.</i></p> <p><i>Better aware of the non-clinical impacts on practice.</i></p> <p><i>Better understanding of future forecasts in our ever changing health care environment.</i></p> <p><i>Broader perspective</i></p> <p><i>By understanding the constant variables changing healthcare quickly. I found it interestingly true the discussion that healthcare will change more in the next few years than it did in 50 years. This is so true even in the past 5-10-15 years since I started in healthcare. We have to be ready for changes and try to advocate for positive changes for us and our patients.</i></p> <p><i>Considering becoming more involved with leadership at work.</i></p> <p><i>Continue to advocate for APP practice</i></p> <p><i>Continue to be proactive on how NPs can be effective and efficient healthcare providers, especially during a pandemic.</i></p> <p><i>Continue to fight for collaborative practice!</i></p> <p><i>Continuing to be mindful and amenable to necessary changes and dealing with future potential obstacles.</i></p> <p><i>continuing to keep options open and work on promoting efficiencies while providing quality</i></p> <p><i>Discuss with more community members instead of focusing change efforts on legislature</i></p> <p><i>Do more teaching about healthcare advocacy.</i></p> <p><i>Encourage our teams to work more closely with benefits to maintain adequate coverage.</i></p> <p><i>Excellent speaker. I enjoyed this presentation the most! Very relevant information.</i></p> <p><i>Excellent forecasting. Reminds me to be more pro-active and aware of healthcare policy.</i></p> <p><i>Focus on the local healthcare market and public policy on the health of the community in which I work. I am a new NP in primary care and have worked as an RN in acute care for 20 years. This presentation affirmed my move to primary care provision. I plan to investigate Six Sigma, which I have meant to do for many years. Now I will.</i></p> <p><i>generally think outside the box more and positive future overall</i></p> <p><i>good overview of what may come. Gave a good light on our current system and role</i></p> <p><i>I am going to be more active in my community educating the public regarding topics discussed today.</i></p> <p><i>I enjoyed getting his perspective on where health care is heading and support of the APNP role.</i></p> <p><i>I feel more empowered</i></p> <p><i>I identified better ways to look at new situations within healthcare</i></p> <p><i>I intend to value what I do at a higher level and recognize that NP's are essential in solving the current health care crisis here in the U.S. This mentality will continue to help me advocate for better quality and care of my patients.</i></p> <p><i>I now want to become more involved in the business side of healthcare to promote change.</i></p> <p><i>I plan to be more aware of and engaged in the progression of the medical field, contributing my voice to where I am able.</i></p> <p><i>I think the big take away for myself was the need for people to get involved locally to make change. Yes, we require federal and state changes but each individual area is very different and starting change locally can lead to change nationally.</i></p> <p><i>I will be better accepting of the unforeseen future and the many possible ways things may change.</i></p> <p><i>I will strive to be more open to the changes that are coming. Change is tough but necessary.</i></p> <p><i>Increased focus on the APRN role in teaching.</i></p>

Increased knowledge of the future of the health care industry.
Individualize ways to include more cost effective care into my organization while still providing best patient care.
Intend to read his latest book to help frame discussions abbot future of healthcare
It gave me valuable information to move forward towards change.
Just being more aware of cost containment in ordering tests etc.
keep working to provide best patient care and experience that I can as an APRN; keep verbalizing needs for changes in our states for APRN 's
Not sure exactly how as I am nearing retirement, however it is knowledge that I will share with the next generation. I know that I will NOT be playing the stock market!
Promote midlevel providers/APP more in the community. I agree - we need the community support to go to bat for us as well.
Push for more recognition of efforts of APPs in healthcare delivery
really enjoyed this presentation and the perspectives
Start focusing more on the most cost-effective work up and treatment option.
stay updated on current trends and needs in health--resolving situation
Support nurse practitioner groups.
support those that are working on changing legislation. PA = key to cost effective health care.
The talk about forecasting the future was especially helpful to me as I venture into my NP role. Specifically as my role will be remote medicine and working in a rural setting.
"Toot my own horn" a little more to the public to get their support f APRN role in Health Care.
Try to get involved with committees at work and let APC voices be heard as future of healthcare
Use medical futility to help direct plan of care.
Very encouraging presentation.
Very informative and I found him motivating to get involved in public policy to help redirect and improve the future of healthcare and the functionality of APs.
Very relevant and topical issue, appreciated presentation
When you change the way you look at things - the things you look at change
Will be rethinking how healthcare can be structured and be more effective in the future.

answer NO:

But it was very thoughtful presentation on the future of advanced practice nursing and things that can impact our future.
Content was not related to clinical practice.
does not apply to current employment
First I must read his book to understand in depth about this topic. Very very interesting.
Good information to know to explore and understand for future practice.
Good presentation
He was informative but nothing to change in my day to day function
His data was not directly useful for my practice
I did feel he provided a valid topic of discussion but left hoping for more insight
I think the content of this keynote was less applicable to my practice and more about policy and economics. Just good information
I would say the material in this presentation is aligned with my current approach to practice
Interesting speaker.
It is always great to discuss the future of health care and how our roles as advanced practitioners could change in an effort to continue providing quality care.
Knowledge based.
New knowledge, but not relevant to my practice.
not applicable at this time , but interesting subject
Not applicable to me at this time.
Not currently practicing, but provides a strong point that return to practice would be more welcomed by community than NPs have been accepted in the past.
nothing was really new information in a practical sense
Retired. However, the information was much appreciated and valuable learning.
The information was fantastic, and very applicable to current climate of healthcare. I am not entirely sure that I can make specific changes within my current practice
This presentation was a great way to take a different look at healthcare and possible future changes. It's easy to get stuck in one way of thinking so this was great.
Very knowledgeable - Interesting information

	YES	NO
Did you notice any bias or promotion of commercial products in this presentation? If YES – please explain:	6	209
<p><i>But understandable as he is author of books; he doesn't personally profit from this so nothing concerning negatively for me; very generous that proceeds go to APRN educational scholarship in Colorado.</i></p> <p><i>Plugged his book(s) numerous times.</i></p> <p><i>Repeatedly referred to his book, though he did acknowledge that he was donating all proceeds.</i></p> <p><i>Seemed the lecture was a plug for his book.</i></p> <p><i>This presented seemed to be more focused on promoting his book(s).</i></p> <p><i>Yes promoting his book.</i></p>		
Do you have feedback for the presenter(s)?		
<p><i>As an APNP, I have been making \$180-\$185K per year for 2 years now (not \$125). I work for Ascension, primary care, and am one of the most productive NPs in my region. I am not sure what PCP MDs make.</i></p> <p>AWESOME JOB! THANKS FOR SHARING THAT ALL PROCEEDS FROM YOUR BOOK(S) ARE BEING PAID FORWARD! HOW GENEROUS!</p> <p><i>bring him back in a year or two. I think his forecast might be more defined - what a treat to hear him speak.</i></p> <p><i>Dr. Bauer is clearly well educated and has an unique background to serve the health care community. I appreciate the way he presented arguments we can utilize to move policy forward to improve access to high quality care. I have concern that you argue the "cheaper" argument farther than is wise. Slightly less discussion of his own achievements would be a good way to win over service providers. Also if you are close with Tim Size, please help him understand why APRNs need full practice authority in WI. He has actively worked against it, even though the people he works for utilize APRNs at a higher percentage than the general population.</i></p> <p><i>Dynamic speaker, wish he had a longer time to talk</i></p> <p><i>Dynamic speaker. Really enjoyed his presentation. I am excited to read his books.</i></p> <p><i>Enjoyable. Made me contemplate how I can use my on-site clinic to have a great affect on population health. I will not be so hard on weather forecasters since I now understanding they are not offering predictions :-)</i></p> <p><i>excellent</i></p> <p><i>Excellent</i></p> <p><i>Excellent</i></p> <p><i>Excellent information</i></p> <p><i>excellent presentation, great historical background</i></p> <p><i>Excellent presentation, loved the ongoing weather analogies.</i></p> <p><i>Excellent presentation, nice to hear physicians supporting NPs.</i></p> <p><i>Excellent presentation. I look forward to reading your book. As someone who has worked in healthcare for over 25 years, I am definitely getting disenfranchised by the events of the past few years and especially the current pandemic. Thank you for sparking me to get more involved.</i></p> <p><i>Excellent presentation. Very informative on inefficiency's cost to healthcare. Great explanation of efficiency vs. effectiveness.</i></p> <p><i>Excellent speaker! Very clearly presented.</i></p> <p><i>Excellent! Thanks for energizing us to continue working and helping to be part of the solution for healthcare for all.</i></p> <p><i>Excellent.</i></p> <p><i>Excellent. Thank you for your diligence and work.</i></p> <p><i>Excellent. Totally agree with outcome should be focus of care plan especially in my population of very vulnerable adults and older adults. I have seen too many procedures, tests, etc completed on my patients especially at end of life. We need more palliative care and consumer participation in health care reform and the advancement of advanced practice nursing care for NP, CNS, CMN, CRNA to practice to the full extent of their education, certification, knowledge and skills.</i></p> <p><i>Fascinating info. Great presenter.</i></p> <p><i>Good presentation.</i></p> <p><i>great discussion</i></p> <p><i>Great Job!</i></p> <p><i>Great lecture!</i></p> <p><i>Great presentation</i></p> <p><i>Great presentation! Bring him back again. What a great supporter of NPs and APRNs</i></p> <p><i>Great presenter!</i></p> <p><i>Great support for nurse practitioners</i></p> <p><i>He was very knowledgeable</i></p> <p><i>I appreciate Dr. Bauer's support for and comments on efficiency and effectiveness of APs. We have always been sensitive to being referred to as the "cheaper alternative", though we are proud of our quality studies. I like his recommendations of harnessing multi-stakeholders to help support us. A big barrier for us is getting the hearing scheduled; WHA wants to prevent the hearing of our FPA bill.</i></p> <p><i>I felt it was a bit self-promoting.</i></p> <p><i>I loved this presentation! You provided a refreshing, and different view point of health care than I previously understood it as. I appreciated your honesty with the unknown. Although, saddening - I appreciated your honest view of the private health care system not changing to</i></p>

single payer entity. I also appreciated your message of health care changes needing to be specific to local markets, and not waiting for national movement to give the local community what it needs. This was so interesting. Thank you for talking to us.

I needed this!

I purchased the book from Amazon. Can't wait to read it!

Loved the presentation!

No, this was a fine keynote, it would not have been appropriate for a session however as it was very broad and getting us to move away from the individual to look at our profession and our industry overall.

Outstanding presentation!

Please reduce the frequent comments about your own expertise throughout your presentation. Your credibility was shared up front. Useful and interesting for political action: thank you for your advocacy.

Really appreciated this conversation being had and am strongly considering reading your book to learn more. I definitely would like to see myself and other advanced practice providers taking more of a leadership role in the healthcare system and just even to be recognized that this is an issue and knowing that you spend time discussing this with other health care providers is inspiring and empowering, thank you!

really good presentation--very engaging

Such a joy to hear him speak again...Please keep challenging the audiences to think about health care delivery in different ways. And thanks for your support of APRN's.

Such a relevant topic, healthcare systems are looking for ways to save money. Hopefully soon we will see some systemic changes.

Thank you for allowing us to see healthcare from a different perspective.

Thank you for sharing with us at our 34th Annual Pharmacology & Clinical Update - Virtual Conference

Thank you for sharing your extensive knowledge!

Thank you for your commitment and dedication to advanced practice nurses!

thank you for your knowledge and sharing things I have felt for any years in practice

Thank you for your time and expertise.

thank you for your wisdom and discussion

Thank you very much for being such a great advocate and supporter of APPs.

Thank you would love to hear more

Thank you!

Thank you, appreciate you sharing your expertise. Appreciate your true understanding of the NP role and contributions.

Thanks for being honest about the future in healthcare. You did not sugar coat it.

Very interesting informative presentation!! Wish I had a few of my non-health care friends who seem to know or have opinion on how to run healthcare listen to your presentation.

Very interesting life experiences

Very interesting presentation, engaging speaker.

Very interesting presentation.

VERY interesting topic. LOVED hearing that the speaker was very PRO-advance practice providers and how, overall, we do save money for the healthcare organization!

Very knowledgeable and informative

Very knowledgeable-Interesting presentation. Thank you for supporting NPs-We need you!

very useful --new content for me

well informed on the topic.

Wonderful, wonderful presentation!! I could see and feel the passion the presenter had for NP's. It was really encouraging and made me feel hopeful that WE (NP's) make a difference now and that we will in the future too.

Would like to hear next year as well Would like to hear comparisons of health care systems in world and what works - what doesn't

You are such an eloquent speaker and a pleasure to listen to. You really highlighted some needed areas of change in the healthcare arena and it makes me excited to be part of the change!
