**Self-Study Activities 2**

TITLE: **Virtual Poster Session**

# Completed Eval for conference: 243

# Completed Eval for SS: 99

**Indicate which of the virtual poster displays you visited:**

*(eval responses were not formatted correctly on the form – only allowed ONE response rather than all 3 for a poster)*

	Viewed PDFs	Viewed Video	Emailed Presenter	N/A
1 - Insights into an Academic Practice Partnership - When Both Sides Work Together	61	22		16
2 - Strategic Planning for Nonprofit Organizations	57	21		21
3 - Professional Association Retention and Recruitment: A Strategic Plan and Strategies to Expand Membership	59	22		18
4 - Long-Acting Reversible Contraception: Patient Satisfaction Six Months After Placement	57	18		24
5 - AOD Use in Teens	59	20		20
6 - Urban American Indian Clinic Smoking Cessation Program	57	20		22
7 - Neonatal Iatrogenic Withdrawal	51	21		27
			<b>YES</b>	<b>NO</b>
Were you able to identify any new approach or outcome that could be applied to your practice as a result of reviewing the poster display? <i>(this question was added after eval opened and didn't always display, so answered by only 30)</i>			16	14

**Do you have feedback for the presenter(s)?**

*A recorded video presentation with power point which is a little longer than the audio intro would be helpful. All done very professionally and appreciated the work involved. Did not have enough time to access these. Should have been made available a week prior to the conference. Done as well as it could be. Excellent videos and poster presentations. Good idea & well done. Great Job! I actually viewed both PDFs AND videos for the posters I reviewed. Perhaps you may wish to change the Evaluation Questions above to allow conference participants to indicate that BOTH were viewed. I enjoyed this much better than in person as I could take my time in reviewing the studies/data I liked it and would do this again. I really liked the video poster session format. In person it can be a challenge but this format the presenter can give the 5-7 minute presentation and there is access to the poster to read through all the details. Only downside is no availability to ask questions of the poster presenter, but there is the option to email questions. I think the presenters did a good job, interesting topics. I thought it was excellent, great job! It is tough doing a presentation over the internet, but I felt the session was wonderful and the presenters did a great job. Liked the poster presentation. would recommend keeping it. the poster were relevant to practice more participation. More time to view during conference. My favorite was Neonatal Iatrogenic Withdrawal and AOD in teens. I also liked the videos done so I could hear from the author{s}. Nice job! One of the posters was hard to visualize because it was not formatted properly on the screen. Thank you, all were interesting and different, and reflects all the varying contributions of nursing to health care improvement. The presenters did a nice job with the videos. It was nice to still see what research colleagues have done! This was a great way to hear them present the overview of the studies. I liked that I could listen to the video, review the PDF and emailed questions to 3 of the presenters. This was a great way to view poster presentation virtually. I think it was done very well. This was a useful way to highlight primarily scholarly DNP projects. However, I very distressed by the way WNA packaged them. There is enough confusion about the DNP vs. PhD without our professional organizations compounding this. DNP graduates are not prepared to do research and their posters were NOT research (although I listened at least the beginning of all --and the presenters all called their product a "scholarly product" -- So call the poster session what it is, DNP scholarly projects, quality improvement projects and IF YOU have research posters you can include that in the title (clearly include in the call for abstracts). I was very pleased with the conference but very displeased with how this was showcased. the posters themselves were fine --and the video creative and added interest. Varied topics interesting. very impressive*

COMPILED EVALUATION RESULTS

Virtual ZOOM platform

*Very interesting to see what people are doing for their DNP projects.*

*very well done!!*

*videos were nicely done- succinct*

*Viewing the presentations was very easy, I like the videos.*

*was a definite variety of video presentations - You tube verses home in their kitchens, verses more formal; was hard to hear Neonatal  
Iatrogenic Withdrawal provider despite turning up my volume. All projects were highly relevant to APNPs.*

*Well done*

*Well done for a virtual presentation. The posters were very appreciated and covered some interesting topics.*
