DRUG TRENDS PODCAST

DISCLAIMER

Views and opinions of the presenter are his own, and do not represent the IACP-Drug Recognition Expert (DRE) Section, the WI DRE Program, law enforcement agencies, or other government entities...

or Chuck Norris...Chuck Norris doesn't do drugs, but if he did his drug habits would collapse drug supply infrastructures around the world

AGENDA

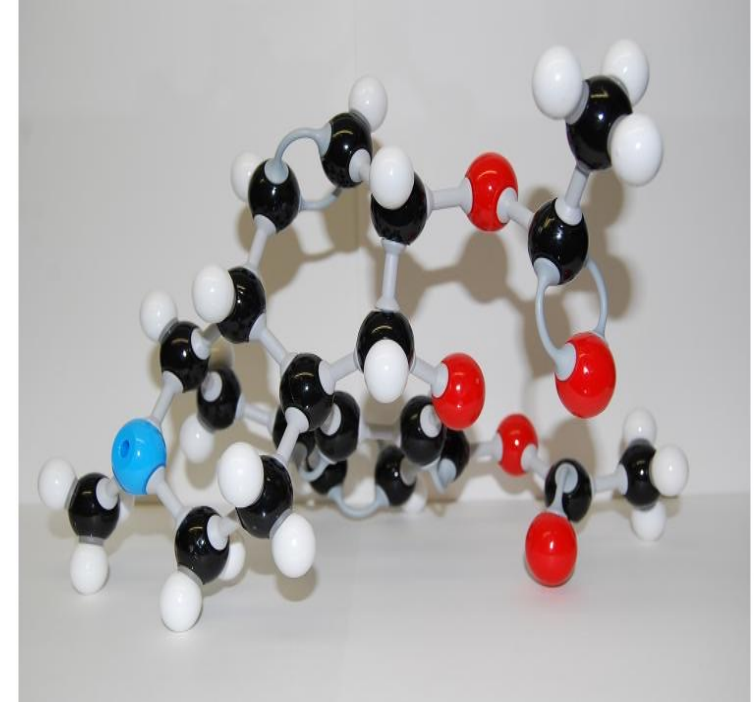

Valentine's Day in Manitowoc

- Illicit and Novel Opiates
- Fraudulent Tablet Manufacturing
- “Do Something!!!” – Bringing Awareness to fake prescriptions
- Narcotic Analgesic impairment ID
- Other Drug Trends
 - Novel THC Update
 - Methamphetamine
 - Inhalants
 - Injecting Crack Cocaine
 - Kratom and Psilocybin

“NOVEL” OPIATES

- U-47700, AH-7921, MT-45, Isotonitazene, Etonitazene, Brophine discovered in WI
- U-47700 goes by “Pinky”, “Pink Heroin”, 7.5x potency of heroin in animals
- Others: Acrylfentanyl, Cyclopropylfentanyl, Furanylfentanyl, 3-Methylfentanyl, Valeryfentanyl, Metonitazene, 2-Methyl AP 237
- Most developed 50 years ago, never Rx’d to humans, unknown effects, ***check out “NPS Discovery” for more on novel opiates***
- Illegal in WI, listed under 961.14(2)

WI SS# 450.11 – Rx Drugs and Devices

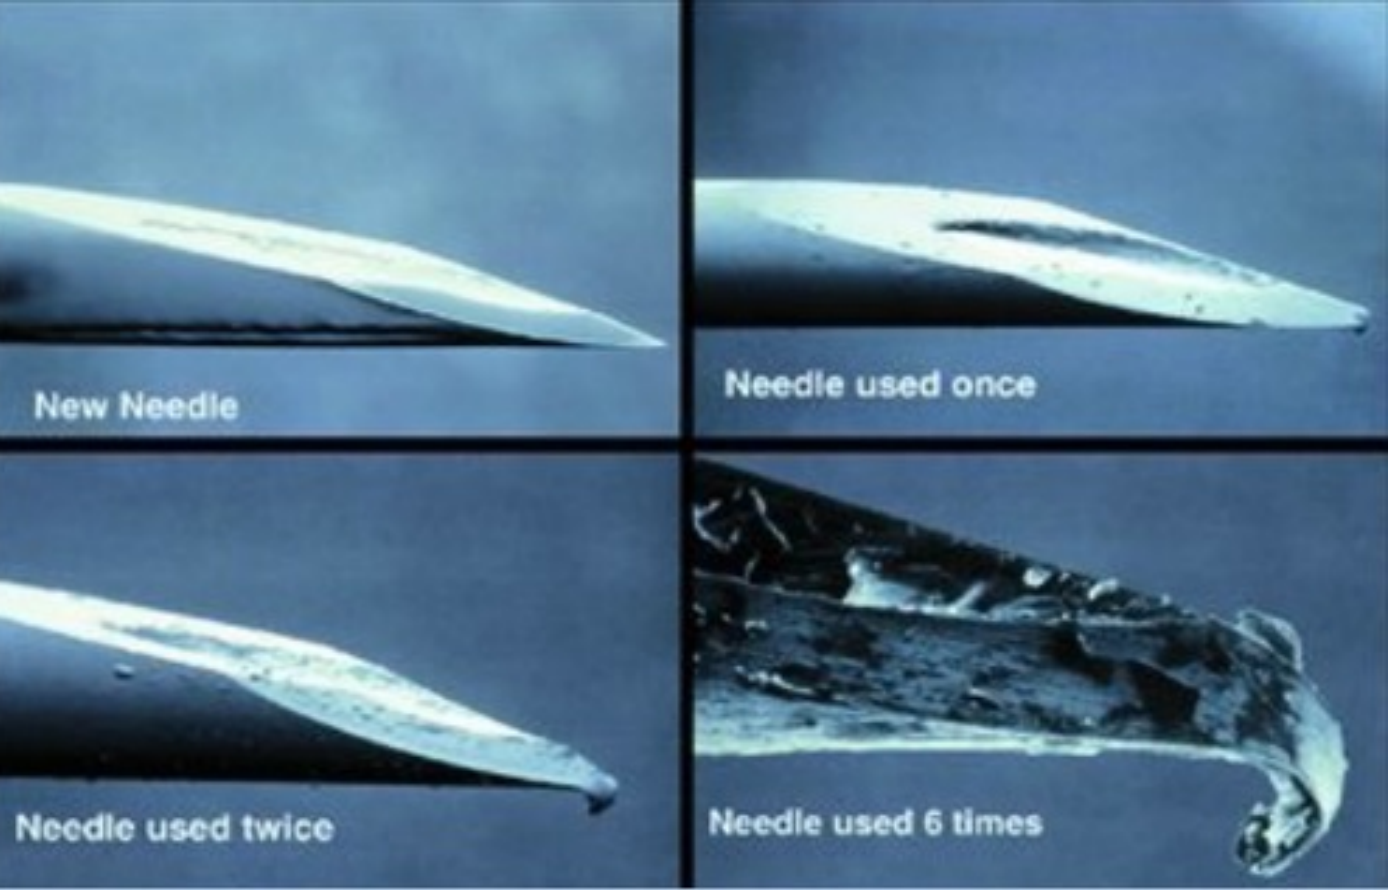

- Covers Rx drugs that are not controlled, Consult with your DA if you're not sure on charging criteria
- 450.07(1)- No manufacturing w/o permit
- 450.074 (3) – Rx Drug Wholesale Fraud Violations
- 450.11(1) – Dispensing Criteria
- 450.11(7) – Prohibited Acts
 - (h) – Possession without valid Rx – misdemeanor
 - (f) – False label on Rx package or label
 - (g) – Manufacturing Rx Drugs – “Intent under this paragraph may be demonstrated by, without limitation because of enumeration, evidence of the quantity and monetary value of the substance possessed, the possession of manufacturing implements or paraphernalia, and the activities or statements of the person in possession of the prescription drug prior to, during and after the alleged violation” – Class H Felony
- 450.11(g)(b) – Poss w/ Intent Rx, Class H Felony

SYNTHETIC “NOVEL” OPIATE IMPAIRMENT

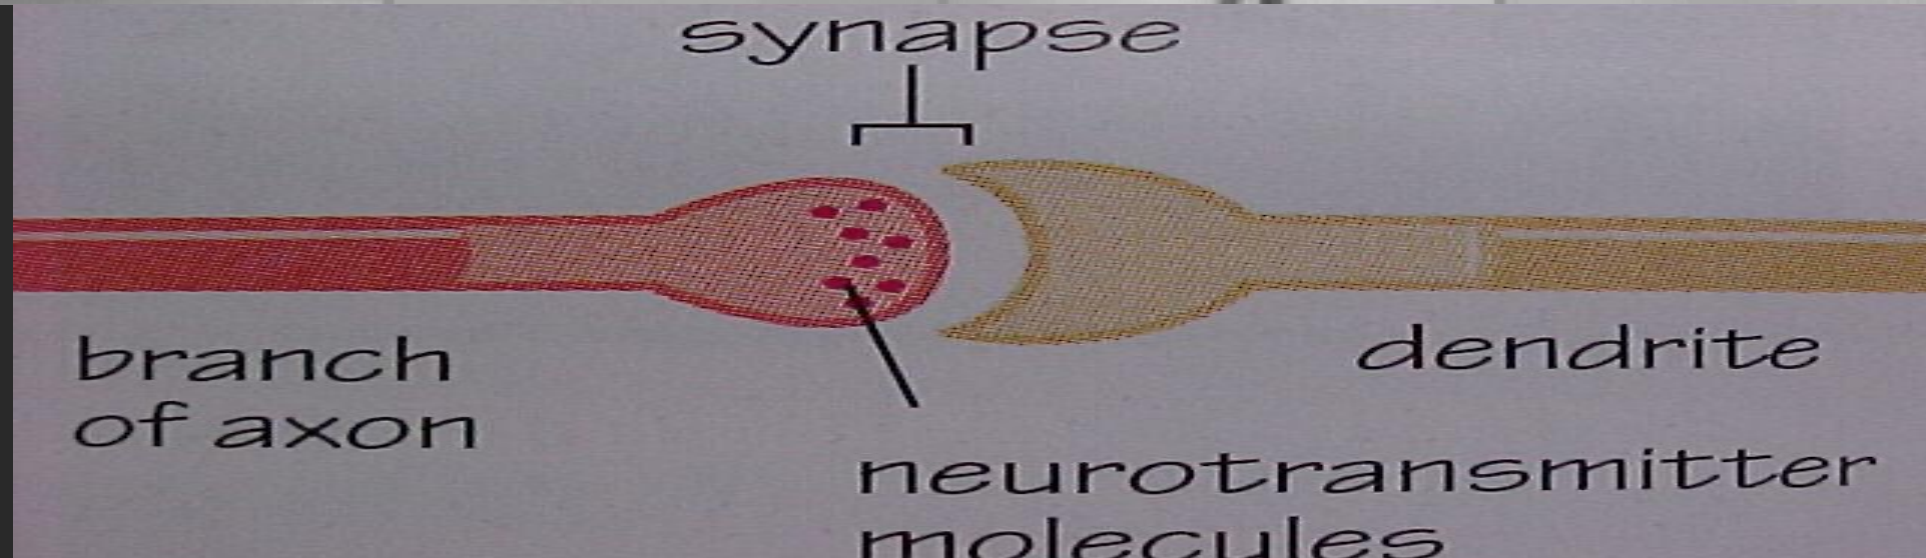

Same impairment like any other narcotic analgesic

NON-MEDICAL INJECTION SITES

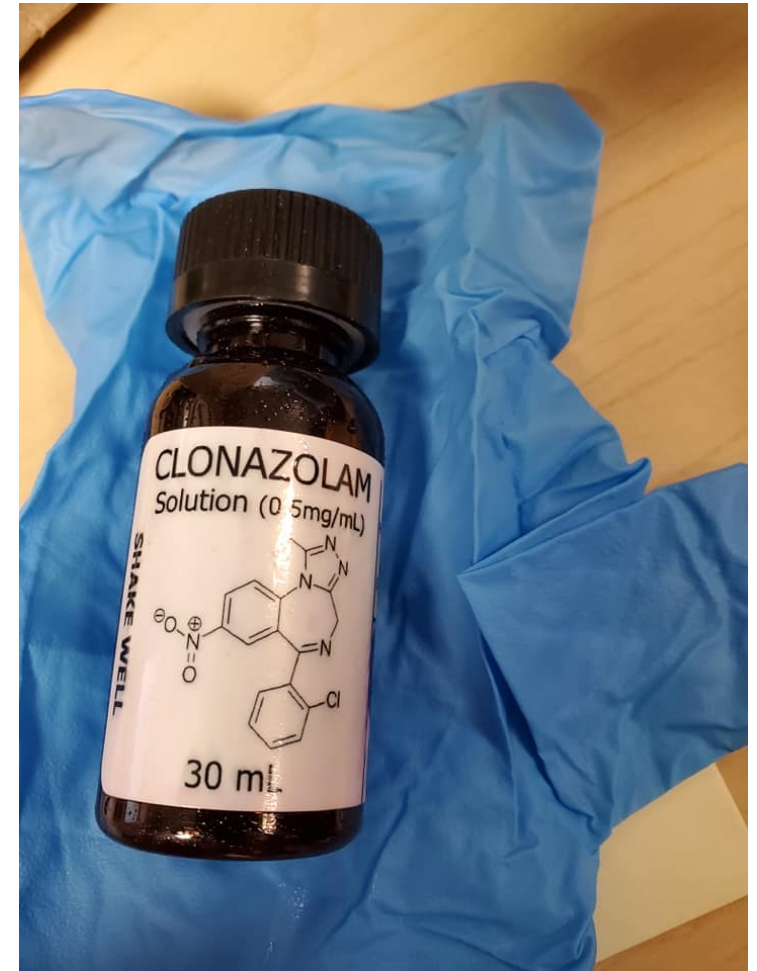

How drugs work in the brain

Synthetic Benzodiazepines

- Designer drugs similar to commonly Rx'd Benzos
- Common in tablet, powder, liquid, or blotter paper
- Designer Benzos more powerful than legit benzos, inconsistent dosages
- Most are uncontrolled

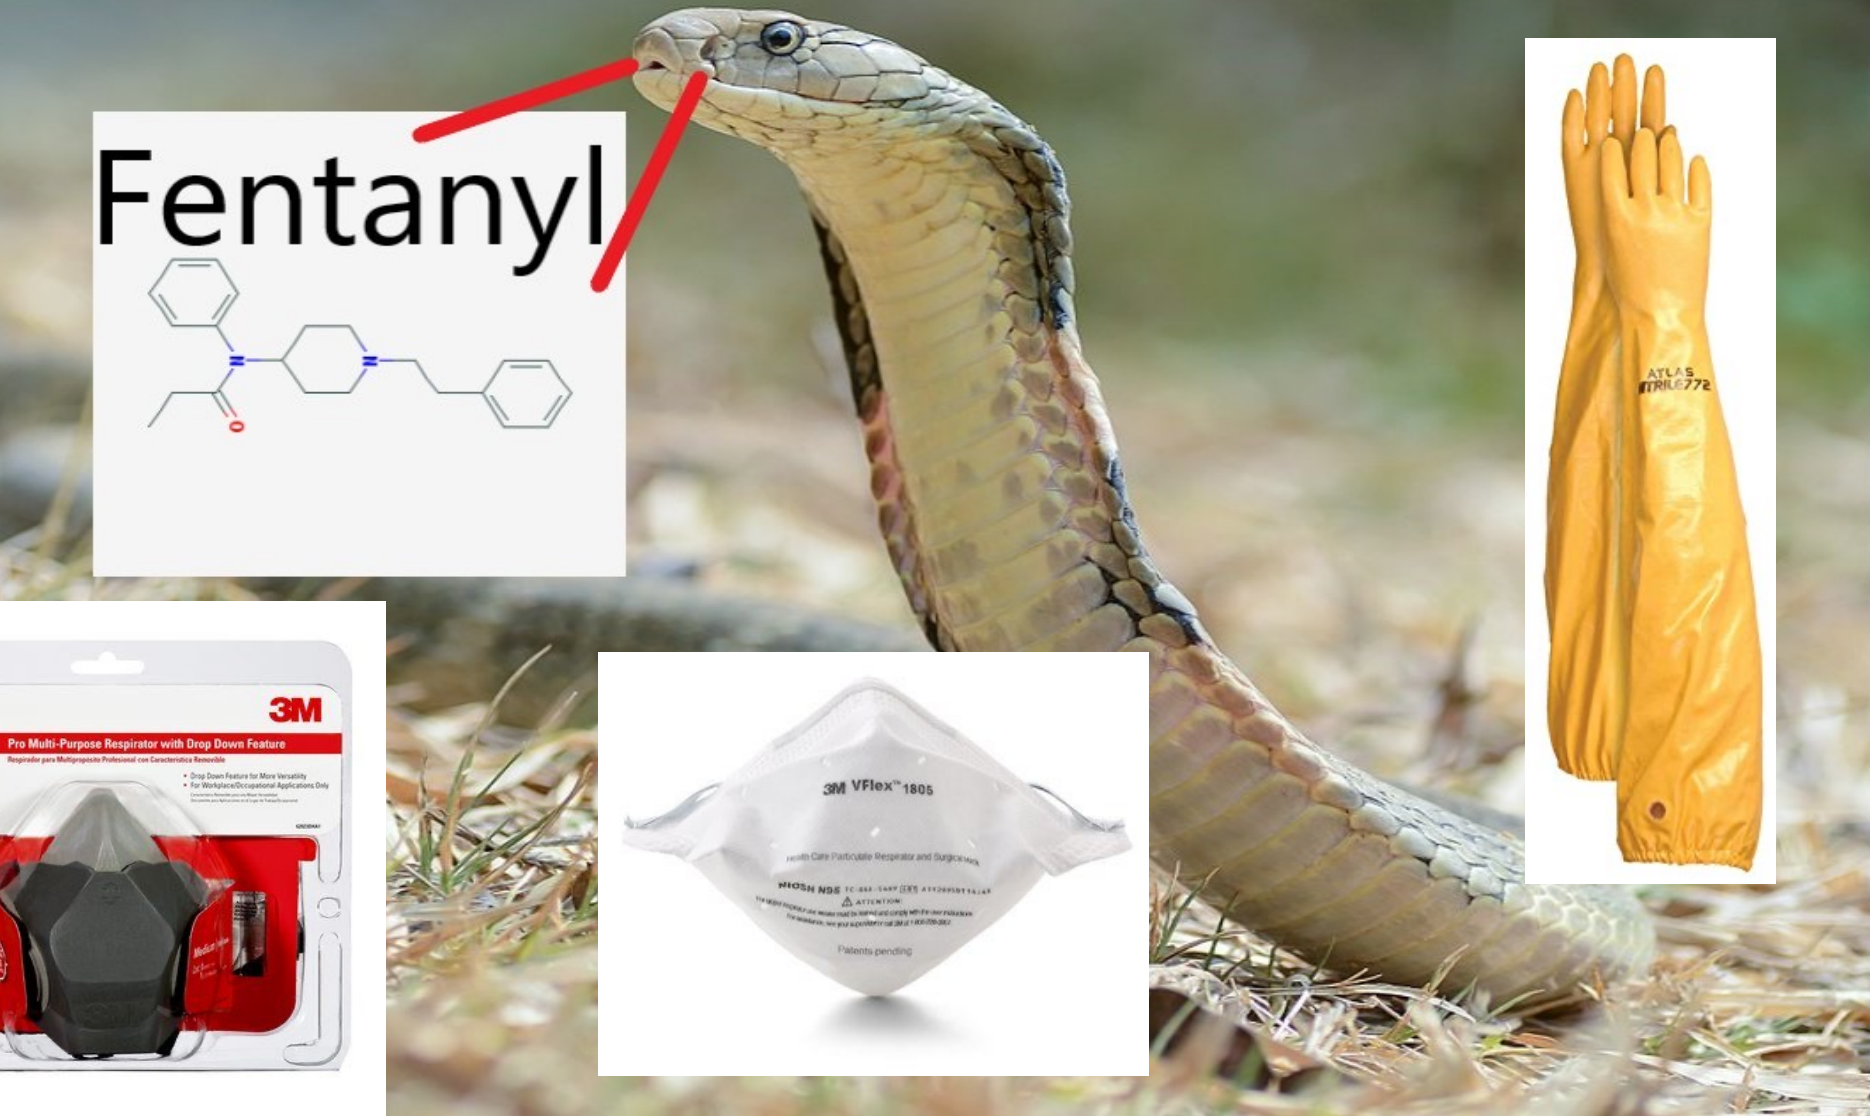

Synthetic Benzodiazepines

- Flualprazolam was added to WI Emergency Scheduling Oct 2020, SS#961.20(2)(ef). 15% of WI DUID had this SB, similar to Xanax
- Etizolam – legal in some countries for sleep, anxiety. Quick acting, 10x more powerful than Valium
- Clonazepam – very potent, warnings for its use on multiple websites. Standard dose .5mg, overdose at 1.0mg
- Flubromazolam – Strong and long acting

Fentanyl Safety

NPS

- Fentanyl Analogues
- U-47000, FIBF, 4-ANPP
- Designer Benzos

Medications

- Acetaminophen
- Tramadol
- Levamisole
- Lidocaine
- Anti-inflammatory/NSAID

Street Drugs

- Cocaine, Meth, Synthetic Hallucinogens (DMT, others)

OTC/Other

- Caffeine
- Papaverine
- Noscapine
- Binding agents

Methamphetamine

- Top reasons from users: “medicinal”, “energy/focus”, “I like the high”, “use with sex”, “won’t OD from meth”
- Generation trends – stimulant surge after opiate epidemic
- Most meth in WI/elsewhere is not homemade
- Perceived to be not as risky as heroin
- Not all users are “jacked up”, you will find them “crashed” too
- Reports: fentanyl mixed in with meth
- Increase in sex crimes, child abuse, violence

Injecting crack cocaine

Crack Cocaine

Vaping Meth

WI HEMP AND CANNABIS REGULATION ENFORCEMENT

- One of many cannabinoids, D8 THC is isomerized from hemp/CBD
- Claims are D8 not as psychotropic as Delta 9 THC/Marijuana
- Feds and some states consider D8 illegal or treated the same as medical/rec marijuana
- In WI...No age restrictions on hemp sales to minors...so kids can go into gas stations and buy it
- **DON'T TRUST ANY LABELING**

Novel THC Products

THC Tincture

BADDER/BUDDER
Concentrates whipped under heat to create a cake-batter like texture

THC Capsules

THC Vapes

CRYSTALLINE
Isolated cannabinoids in their pure crystal structure

Delta-8 Flowers

THC Edibles/Gummies

THC-A...BASICALLY MARIJUANA

Grow Hemp Wisconsin
Mitch Craven · 2h · 🌐

So who is selling natural unsprayed THCA flower? Definitely becoming all the rage from what I hear. I reckon if it tests under for d9 it's legal right? Some of this stuff is actually pretty fire and it's at a lower cost than the sprayed stuff we've been selling for the last few years.

hempgeneration.com
THCA Flower - Death Star

Description

This premium hemp flower is a indica dominant hybrid strain grown indoors and cured with just the right moisture levels using cryo cure technology.

Musky, sweet, earthy aroma

Genetics: Sensi Star X Sour Diesel

THCa – 23%

Delta 9 THC – 0.2%

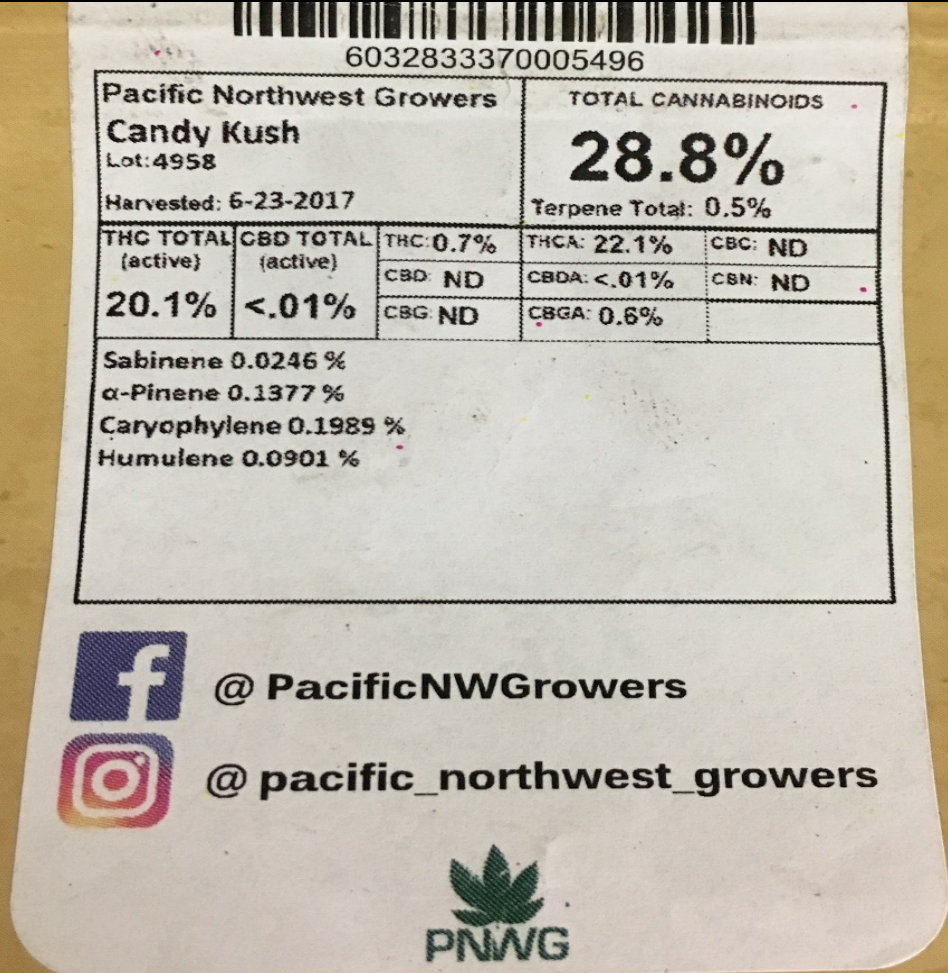

Total Cannabinoids – 23.9%

Total Terpenes – 1.4%

Very dense small to medium size buds.

OTHER THC COMPOUNDS FROM HEMP

THC-P - Tetrahydrocannabiphorol

Claims are it is 33x stronger than MJ
– 7 carbon atoms on alkyl side chain
vs. 5 for Delta 9 THC

THCV - Tetrahydrocannabivarin

Claims are it is an antioxidant
and neuroprotector and
suppresses appetite.

Delta 10 - THC

Delta 6 - THC

HHC - Hexahydrocannabinol

HHC claims are its not as potent as
marijuana, more energetic high,
and doesn't show up on drug
testing.

Legal Delta 9 THC from Hemp

Same psychotropic cannabinoid in
MJ, workaround is final product
contains less than .3% D9 THC

WI V QUAHEEM MOORE: 2021AP938-CR

- Application of “unmistakable odor of marijuana”, WI v Secrist and searching vehicles after LEO detects odor of MJ
- LEO stopped D for speeding, noticed odor of MJ, search revealed cocaine and F
- COA said search was no good, NO PC to arrest and SIA
- LEO didn’t testify about his T&E recognizing MJ odor
- D claimed he vaped CBD – CBD vs MJ odor
- State petition is asking to review, standard COA set is too high and not the usual quantum of evidence needed for PC
 - State argues LEO’s detection of “strong odor” enough for PC, no need to rule out innocent explanations

“Learn the Lingo”

- ~~Pot~~
- ~~Weed~~
- ~~Dope~~
- ~~Marijuana~~
- Connoisseur -
CANNABIS!!!

- Bud/Flower
 - Indica or Sativa Dominant
- Kief/Hash
- Concentrates
 - Dabs, Oil/BHO, Shatter, Wax, Tinctures, Live Resin, QWISO
- Edibles
 - Gummies, Budder
- Terpenes/Profile
- Trichomes

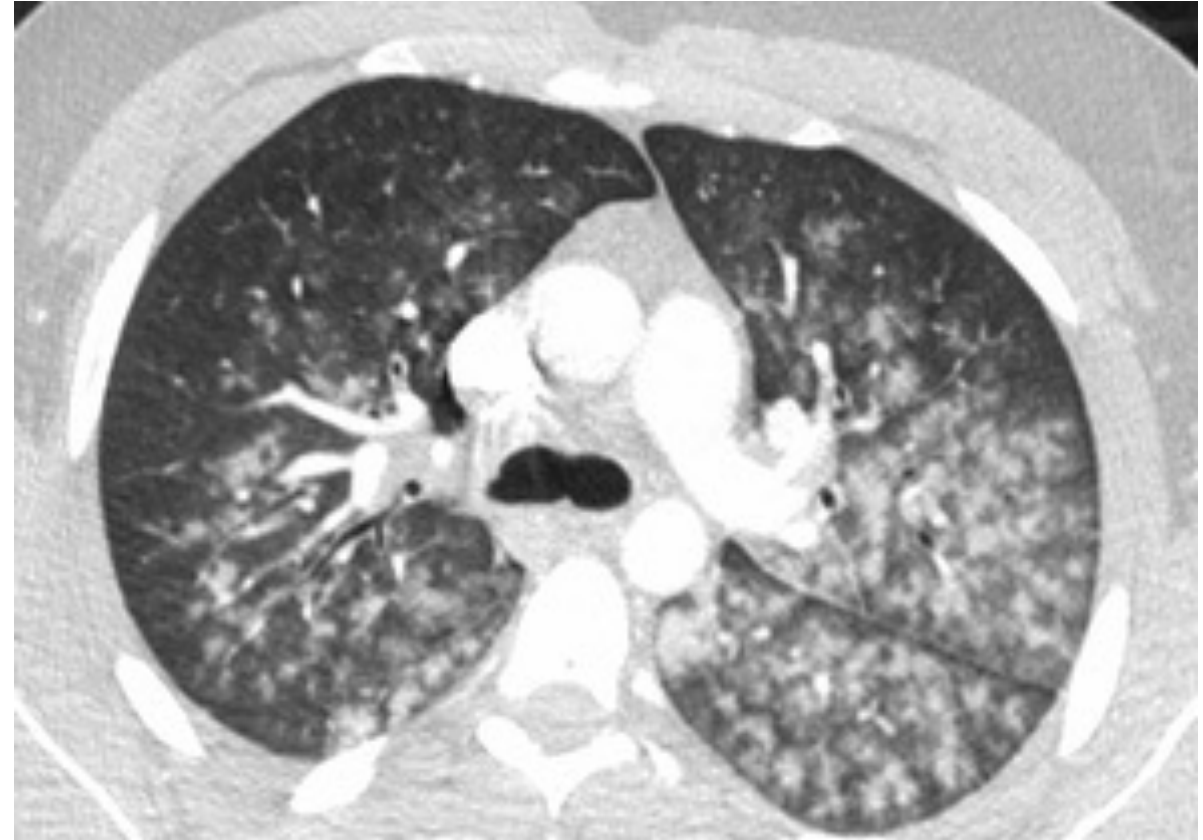

FDA SAFETY CONCERNS

- D8 has not been evaluated for safe use
- Adverse effects from D8 products
- Psychoactive and Intoxicating effects
- Use of potentially harmful chemicals to create D8
- Child Poisoning complaints

SAFETY CONCERNS

- Warnings from NORML and other cannabis groups: *“NORML does not endorse commercial sale of these or other new synthetic cannabinoids until more research on their safety and purity has been performed.”*
- Clandestine Lab dangers
- Side effects from vaping compounds, namely propylene glycol
- Cutting agents, vitamin E acetate and similar viscous chemicals

Source: American Journal of Roentgenology

1,1 Difluoroethane

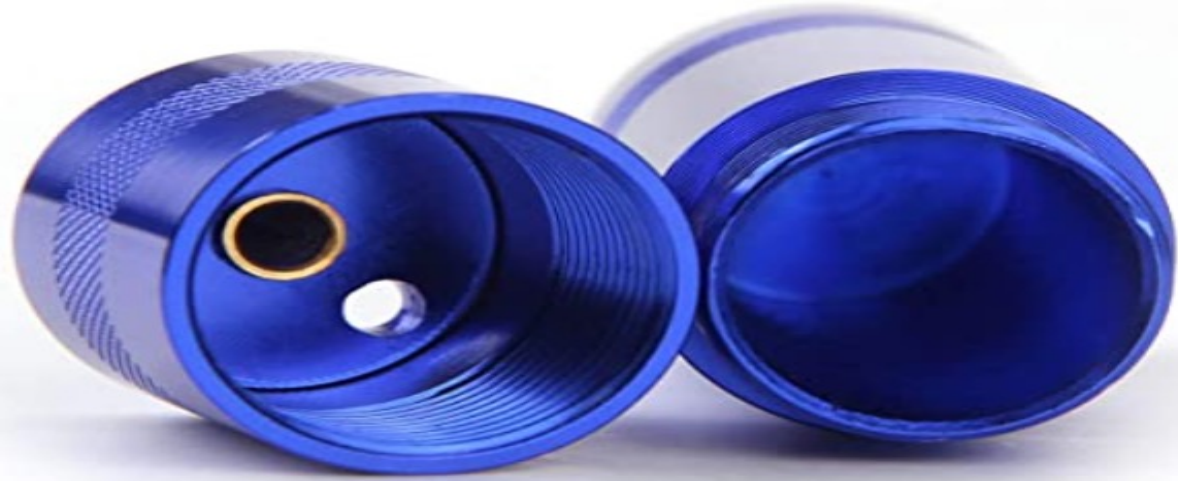

- **NOT AIR**, a mix of toxic liquid and fumes
- Mixes with air and removes dust/debris
 - When abused, doesn't mix w/ air, pure chemical
- Short blasts most effective
 - Inhale 5-7 seconds, hold breath 10 sec, high 16 sec
- D and other Fluorocarbons are 4x/5x heavier than air, settles in bottom of lungs
- Bronchial Dilator, lipophilic, euphoric

Wasping

- What is it?
 - Using wasp spray to get high
- How is it made?
 - Spray onto a metal surface and apply electricity or heat to crystalize liquid spray
- The High?
 - Chemical that kills bugs, Prethroids, block nerve signals and stimulates the sympathetic nervous system to induce a meth like high as a substitute for or in addition to meth

Inhalant Crash Similarities

- Operator passes out, amnesia
 - High Speed
 - Crash may happen in a location not normally associated with crashes (ie: mid-block residential, non-intersection)
 - No corrective action taken before crash, (steering, brakes, etc)
 - Cans/paraphernalia in or under car – **CHECK IF COLD**
 - Reckless Driving 911 Complaint
- **SS# 941.316(2)(b)**
Intentionally abuses a hazardous substance
 - **Look for receipts: date/time of purchase and how much used**

MTPD Crash Jan 2019

MTPD Crash Jan 2019

MTPD Crash Jan 2019

- FTN: all six sequences exhibited imp
- HGN: 6/6, 35 Deg, LOC present
- Pupils: all normal
- Rebound Dilation present
- 66, 74, 66 bpm, 160/70, 96.7
- Redness in nasal cavity
- Changed story, no drug use prior to crash during interview/step 10

MTPD Crash Jan 2019

- DRE/Ofc. DeValk conducted DRE eval approx. 1 hr after crash.
- D had injuries (lip hit steering wheel) didn't want medical attention
- D admitted he lost consciousness before crash
- Fast internal clock (15 sec), ET
- 3 clues on WAT (stance, arms, turn)
- 3 clues on OLS (arms, foot, sway)

MTPD Crash Jan 2019

	Result	Units
Ethanol	Not Detected	

Comments:

Additional test results will be reported below when all laboratory analyses have been completed.

	Result	Units
1,1 Difluoroethane	Present	

	Result	Units
Delta-9-THC	2.9	ng/mL
11-Hydroxy-THC	1.2	ng/mL
Carboxy-THC	28	ng/mL

PCP – Phencyclidine – aka “angel dust”

- Developed in 1950s but discontinued as patients had undesirable side effects
- Potentially dangerous: user feels no pain with severe hallucinations
- Common method of ingestion is dipping menthol cigarettes into PCP liquid and smoked
- According to SAMSHA and other data, most users are male and African American

PCP – Phencyclidine – aka “angel dust”

Bucket chemistry: Any chemical process or technique that is relatively low-tech, and does not require specialist equipment or skills, or precise measurement or control.

PCP General indicators

- Perspiring
- Blank stare
- Cyclic behavior
- Chemical odor
- Increased pain threshold
- Incomplete verbal responses
- Warm to the touch
- Repetitive speech
- Hallucinations
- Confused
- Possibly violent and combative
- "Moon walking"

KRATOM

Presenter's Investigation & Internet

- Bitter taste – use in capsules or other medium to cover up taste
- Help with opiate withdrawal or cravings, “at least it’s not heroin”
- Can reverse effects with Narcan
- Withdrawal similar to opiates, especially with heavy use
- Dosage user specific (teaspoon is approx. 1.5g), quick onset 5-15 minutes, lasts 1-5 hours
- Miosis and Narcotic Analgesic effects

Kratom

Photos from DRE
Adam Waeghe

Psilocybin Mushrooms

- 4 hallucinogenic chemicals: psilocybin, psilocin, and 2 others
- Large serotonin dump from ingestion
- VERY low toxicity, would have to consume your body weight in raw shrooms to OD
- Low Dose <10mg, med 10-20 mg, strong 20< mg, depends on variety
- Most standard urine tests don't test for psilocybin
- **961.41(3)(d)** *Certain hallucinogenic and stimulant drugs.* If a person possesses or attempts to possess...psilocin or psilocybin
