

Dexcom

Product Theater
September 29, 2023 from 1:00 – 1:30pm

Come learn all about Dexcom, past present and future! We will take a walk through Dexcom's 55-year history that began right here at the University of Wisconsin back in 1967, and we will highlight all of the major milestones that Dexcom was the first to accomplish and which have expanded the use of CGM to what it is today. You will also learn about our newest CGM, the Dexcom G7, and will have an opportunity to handle our Demo Kits and watch a demonstration of how to apply our all-in-one sensor/transmitter and overlay patch. We will send you off to your next session by concluding with a little sneak peek into what's to come in 2024 and beyond!
